Introduction

What is PrimeLand Hub?

PrimeLand Hub is a real estate platform that makes buying and selling properties easy and direct, without the need for middlemen. It helps users understand market trends, estimate property prices, and keep track of ownership records. With smart technology, the platform ensures a smooth and transparent experience for everyone.

Key Features

- Real-time property listings
- Ownership tracking
- Price predictions
- Chatbot for assistance

Modules

1. User Authentication & Profile Management

2. Property Listings & Management

3. AI-Based Property Price Prediction

4. Messaging & Contact System

5. AI-Powered Chatbot for Assistance

6. Market Analysis & Investment Insights

Module 1: User Authentication & Profile Management

1 Secure user registration and login with OTP verification.

2 Profile editing including name, contact, image uploads, and property preferences.

3 Session-based authentication to manage user access securely.

Module 2: Property Listings & Management

Users can add, edit, view, and delete property listings.

Listings include images, descriptions, property type, price, and location.

Admin dashboard for managing properties efficiently.

Module 3: AI-Based Property Price Prediction

1 — Uses Machine Learning (ML) models to predict property prices.

2 — Factors considered: Location, property type, and historical price trends.

3 — Helps buyers and sellers make informed pricing decisions.

Module 4: Messaging & Contact System

1 Users can send inquiries via the Contact Us form.

2 Admins can reply to messages directly from the dashboard.

3 Messages are stored for future reference and user interaction tracking.
